EverBOX GRIP

The new approach to mobile distribution!

For us at MENNEKES the intensive dialogue with our customers is the most important driving force for innovation and developments.

This enables us to respond individually and flexibly to specific requirements. Moreover it provides us with a genuine impression of what is required in terms of solutions for the day-to-day practice of very different industries. Often impetus arises from such insights that drives us to new product innovations.

This was the case for the new mobile distributor EverBOX GRIP!

Mobile, stable and handy!

These qualities are at the heart of the requirements specification for this new mobile solution. And the implementation is just as consistent and uncompromising.

It all started in an intensive dialogue with a customer in the shipbuilding sector. Here the harshest conditions that could be found for a mobile distributor predominate. In this sector, mobile means „highly mobile“, stable means „virtually indestructible“, and handy means it must be possible to maneuver it through the most narrow areas. The result was so convincing that we have further developed it into series production maturity.

Feature overview

With the EverBOX GRIP, you literally have „a firm grip on everything“. The two grips (handles) are not only an effective design feature of the EverBOX GRIP – they also form the connecting, static structure in which the distributor enclosures and fusing elements are reliably integrated. As practical carrying handles they also offer the user an optimal hold for different carrying positions. With this completely new approach to the principle of

„mobile distributors“ we do not overpromise when we say: With the EverBOX GRIP you have a firm grip on your mobile distribution!

Large grips

Lateral grips offer good handling possibility and simultaneously act as bumpers for the actual distributor enclosure.

Fusing is protected, but easily reachable

Fuses under transparent activation flaps. Easily accessible fusing elements.

Robust and impact-resistant enclosure

The actual PE enclosure of the distributor is extremely robust and offers excellent protection for the fitting options – additionally safeguarded via the grips as exterior bumpers.

Grips can be selected in two colors

All EverBOX GRIP combinations can be equipped either with red or black grips.

Protection class

The EverBOX GRIP offers the IP 44 degree of protection.

Easy storage

Thanks to the grips up to four EverBOX GRIP distributors can be stacked one on top of the other. The receptacles that can be operated from above offer optimal reachability thanks to their angled position.

Connection

The EverBOX GRIP is available with a permanently installed supply cable (2 m).

A distributor for all situations ...

Born as an idea at a shipyard, developed for use in the shipbuilding industry, produced for use wherever space is limited and the conditions are harsh – the EverBOX GRIP is now ready for you!

Whether in boiler construction, for tasks on and in pipelines, in tunnels or mining galleries, but also in demanding outdoor use – the EverBOX GRIP will be running in top form, particularly when things get tight, in the truest sense of the word.

But even if adequate space is available, you will appreciate their practical, compact design, as well as their stability: in structural steelwork, in stage technology, rescue deployment for fire departments, disaster response units!
